### DETAILED ACTION

1. This is a response to the amendment and remarks/arguments filed on 03/13/2006.
2. The amended drawings (Figs. 1 and 4) have been approved.
3. Claims 1-13 are pending.
4. Applicants' remarks/arguments filed 03/13/2006 are persuasive and obviate the rejections of claims 1-13. Accordingly, **claims 1-13 are allowed.**

### EXAMINER'S AMENDMENT

5. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
6. Authorization for this examiner's amendment was given in a telephone interview with **Roger D. Greer** (Reg. No. 26,174) on 04/10/2006.
7. The application has been amended as follows:
8. **Claims 27-29** are canceled.

#### ***In the specification:***

On page 33, before " ABSTRACT OF THE DISCLOSURE" delete in entirety " AN ACCESS CELL DESIGN AND A METHOD FOR ENABLING AUTOMATIC INSERTION OF ACCESS CELLS INTO AN INTEGRATED CIRCUIT DESIGN".

(Note: the title should not be included in the abstract)

Art Unit: 2825

On page 33, line 10, after "cell." delete in entirety "A method for inserting access cells into an integrated circuit includes modifying a cell library so that a library description of a standard access cell is temporarily defined as having two terminals, modifying a netlist so that a set of nets listed therein are represented as two different nets, and modifying the netlist to include a set of access cells each of which is defined as being connected, at each terminal, to one of the two different nets. The modified netlist and modified cell library may then be used by a place and route tool to automatically create a layout of the integrated circuit having access cells inserted therein. After the layout has been created, the modified netlist is again modified so that the two virtual nets are once again represented in the netlist as a single net and the layout is modified so that the two virtual nets are represented in the layout as a single net."

(Note: the abstract is amended because it contains more than 150 words).

***In the claim:***

**Claim 2**, line 2, delete " said first, second and third paths" insert -- said first, second current paths and said first leg--.

***Allowable Subject Matter***

9. **Claims 1-13** contain allowable subject matter.
10. The following is a statement of reasons for the indication of allowable subject matter:

**Claims 1-13** are allowed *because the prior art of record does not teach or fairly suggest* an access cell for an integrated circuit having a current pathway

Art Unit: 2825

disposed therein for routing current through said access cell, said current pathway comprising: a first current path disposed lengthwise in said access cell; a second current path disposed lengthwise in said access cell; and a third current path disposed between said first current path and said second current path, said third current path having a set of three legs; a first of said legs being disposed generally parallel to said first and said second current paths; a second of said legs connecting said first current path to said first leg; and, a third of said legs connecting said first leg to said second current path.

11. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
